

Context

This is a US job secured by one of our engineers as a senior frontend engineer on Apr 2024. The company has several engineering teams but most of them are full-stack, backend and infrastructure engineers. They have only 4 – 5 dedicated frontend engineers totally. They hold bi-weekly frontend architecture meeting together.

Tech stack

React, TypeScript, Material UI, Angular, C#, .NET, Azure

Role:

This is a senior frontend engineer and you'll have to take part in development of frontend applications. You'll also have to review frontend PRs, suggest great proposals to improve frontend codebase and collaborate closely with team members, especially backend engineers, QA engineer, and other frontend engineers in other teams.

Requirements:

- Solid frontend development experience with React and Angular
- JavaScript and TypeScript expert
- Proven experience with Cypress
- Prior experience with Azure and Microsoft environment
- Must be working in EST business hours (8 am – 5 pm)
- Must be working in the company laptop remotely (must have stable internet connection)
- Solid software fundamental knowledge
- Great communication skills
- Excellent skills designing frontend architecture
- Code reviewing experience

Interview process:

- 20 mins: Culture fit – English & communication skills, HR questions
- 40 mins: Technical Interview with live coding
- Sign NDA and solid background check

Start date: ASAP

Salary: \$2500 for the first 3 months, up to \$3000 afterwards based on your performance if you show us trustworthiness and skills

Pay period: The end day of every month – i.e. 8/31, 9/30, 10/31, 11/30, 12/31

Shift: Mon – Fri 8 am – 5 pm, except US federal holidays

Notice period: 2 weeks, which means that both parties (you can me) have responsibility to let other party know that partnership needs to be terminated for some reason as long as the job itself is not ended immediately because of performance issue or other critical security issues.
